Scorpion 640

Scorpion 640 is a high resolution thermal weapon scope suitable for a wide range of weapons and also can be used as a helmet mount or handheld unit. This thermal imaging scope works on shutter less technology with sharpest image output using 12 microns high resolution thermal imaging sensor. **Scorpion 640** comes with easy mounting and zeroing features which makes it best suitable for combat ready applications.

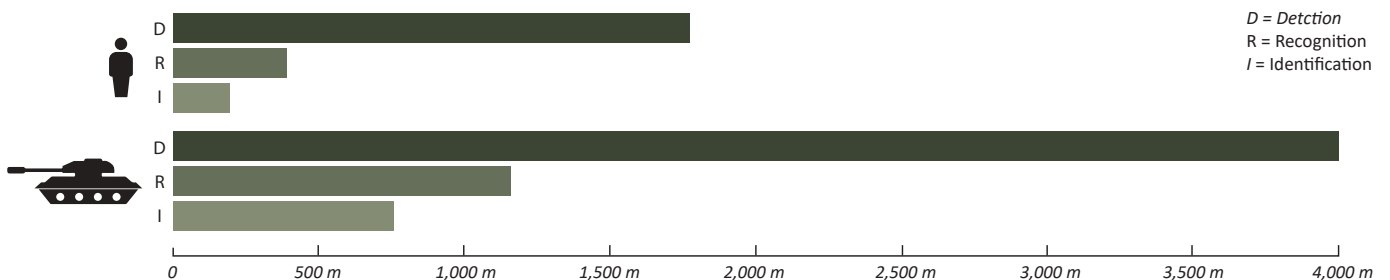

Characteristics

Sensor	640x480 uncooled microbolometer; 12 micron
Objective lens	50mm;F1/0
Magnification, x	4x
Field of view (HxV), degrees	8.7x6.5
Detection range, m	1800 m
Frame rate, Hz	30Hz
Display	OLED
Resolution, pixels	800x600
Video / photo resolution, pixel	640x480
Video / photo format	.mp4/.jpeg
Built-in memory, GB	16
Power Supply	2 CR123 Batteries
Material	Aluminium Alloy
Battery Backup	>6 hrs
Weight	<1kg

Scorpion ranges

The Scorpion ranges for detection, recognition and identification.

Irrespective of the conditions,
Enhancing Visibility.
